

# V SAN OXY

## SANITIZING DETERGENT FOR SURFACES READY TO USE

### COMPOSITION

V SAN OXY is a liquid detergent made of stabilized hydrogen peroxide at 3%.  
V SAN OXY is liquid, clear with a characteristic smell and non-foaming when used.  
Density at 20° C: about 1,02 g/mL.  
pH (sol. 1% in H<sub>2</sub>O): about 2.

### CHARACTERISTICS

V SAN OXY is a detergent for RTU surfaces (Ready To Use). Thanks to its specific formulation cleans and deodorize surfaces developing a secondary, interesting sanitizing activity.

### APPLICATIONS

V SAN OXY is used for the cleaning and sanitization of all surfaces resistant to acids and peroxide products.

### DIRECTIONS FOR USE

Spray on the surfaces to clean, from a distance of 30cm, from 10 to 40 mL of V SAN OXY, rub with a clean cloth or sponge and let dry.

### PACKAGING

5kg drums.

### HAZARD

Store away from heat sources, max 30° C and in an aired place, in its original drum well sealed.  
The product is non-flammable.  
Based on the current European regulations the product is classified: hazardous (see safety data sheet).
