

DETERGENTI

# SPRAY STERIL ECO

DETERGENT, SANITIZING AGENT

## COMPOSITION

SPRAY STERIL ECO is a liquid detergent product with a supplementary sanitizing activity, with alcohol. Does not contain colouring agents or aldehydes.

## APPLICATIONS

SPRAY STERIL ECO is used for sanitizing procedures in areas where it is not possible to use water. Its formula has been designed to obtain a product which prevents the proliferation of mold on wood (unpainted) barrels and casks. Tests made have shown that repeated application of the product on a monthly basis prevents the development of mold on the treated surfaces. Due to its specific composition, it is also suitable for treating parts of the bottling system including taps, corking machines etc. preventing the proliferation of microorganisms particularly when the system is not working. It can also be used in sanitizing processes for all food sectors.

## DIRECTIONS FOR USE

The product is ready to use. It can be applied to barrels after making sure the bung hole is correctly closed in order to avoid contact with the wine. If there is a significant amount of hypha, after applying the product wipe away the remainder with a paper towel. For all other applications, do not let the product come into contact with food. After applying, eliminate all residue with a paper towel and where possible (e.g. fillers) rinse briefly.

# SPRAY STERIL ECO

DETERGENT, SANITIZING AGENT

## PACKAGING

10 kg drums.

## STORAGE

Keep the product closed in its original container, away from sources of heat, open flames and sparks. Do not smoke when using the product. Do not spray on burning objects.
