

# V SAN MANI

## ALCOHOLIC HAND GEL SANITIZER

### COMPOSITION

V SAN MANI is liquid, clear, with alcoholic smell.  
V SAN MANI is a water-soluble solution containing 70% isopropyl alcohol (V/V).  
PH: Approx. 5.5 - 6.5 as it is 20 °C.  
Relative density: 0.93 G/ML.

### CHARACTERISTICS AND USES

V SAN MANI is a hand sanitizer that does not dry the skin thanks to its active ingredients, in fact the presence of glycerine ensures its softness even if used frequently.  
The high concentration of alcohol also guarantees a wide range of action without rinsing, it dries quickly by itself from the surface.

### DIRECTIONS FOR USE

Pour a small amount of product directly onto your hands and rub for a few seconds until completely dry.

### PACKAGING

4 kg tanks.

### DANGER

Store away from heat sources max. 30°C in a ventilated place, in the original well closed container.  
The product is classified according to the European regulations in force: dangerous (see safety data sheet).
