

DETERGENTI

V LUBE HP

LUBRICANT FOR CONVEYORS, SOAP-FREE,
NOT AFFECTED BY WATER HARDNESS

COMPOSITION

V LUBE HP is a lubricant, detergent, not affected by water hardness and suitable for any kind of conveyor and package transported.

CHARACTERISTICS

V LUBE HP has many advantages in comparison to soap based lubricants.

- Compatibility with aluminum, glass, steel, waterproof cartons, plastic and poly laminated materials;
- Reduced use concentration;
- Low quantity of foam.

APPLICATIONS

V LUBE HP can be used in every field of food industry where in addition to the activity as lubricant, a sanitation activity on conveyors is required.

DIRECTIONS FOR USE

V LUBE HP can be used both in the immersion systems and in the centralized distribution systems.

The use concentration 0,1 to 0,3%, changes according to what you need and to the equipment type. Being incompatible with soap based lubricants it's important to proceed with the cleansing of the conveyors before using V LUBE HP. At the end, it's recommended a stability test of the solution. Consult the VASON technical team for any requests.

V LUBE HP

LUBRICANT FOR CONVEYORS, SOAP-FREE,
NOT AFFECTED BY WATER HARDNESS

PACKAGING

25 kg and 200 kg drums.

STORAGE

Store the product in its package, properly closed, far from heat sources.

HAZARD

Based on the current European regulations the product is classified: hazardous (see MSDS).

CORROSIVE ACTION

V LUBE HP is only partially corrosive towards carbon steel, zinc, copper and its alloys.
