

STERIL LEGNO

SANITIZER FOR WOOD WINE BARRELS

COMPOSITION

STERIL LEGNO is a liquid sanitizer made up of oxidizing and stabilizing agents, specific for wood wine barrels.

CHEMICAL - PHYSICAL CHARACTERISTICS

Physical appearance	Liquid
Colour	Violet
Odour	None
Density at 20°C	1.00 g/mL
pH (sol.1% in H ₂ O)	7.5 ± 12
Foam formation	Absent

APPLICATIONS

In combination with a washing cycle with DETAR LEGNO FLUID.

DIRECTIONS FOR USE

A concentration between 0.5 – 1% at a temperature of 15-25°C is suggested. The change of colour of the solution from violet to dark green indicates the end of the sanitizing activity.

DETERGENTI

STERIL LEGNO

SANITIZER FOR WOOD WINE BARRELS

PACKAGING

10 kg drums.

STORAGE

Avoid bumps, improper handling of the packages can cause product leakage. The product is non-flammable but can have carburant activity. Protect from frost, keep the product in its original package properly closed, away from heat sources.

HAZARD

Based on the current European regulations the product is classified: hazardous (see MSDS).

CORROSIVE ACTION

At normal conditions STERIL LEGNO solutions don't have any corrosive activity towards surfaces and materials it is in contact with. Be careful in the case of contact with copper or brass surfaces.
