

DESTAR LEGNO FLUID

TARTRATE-REMOVAL DETERGENT FOR WINE WOOD BARRELS

COMPOSITION

DESTAR LEGNO FLUID is a sanitizer specifically studied for sensitive materials. It contains caustic potash and is strengthened by specific complexing agents and corrosion inhibitors. It neutralizes the residuals of sulphuric anhydride and sulphurous acid; it also neutralizes the acetic acid residual. DETAR LEGNO FLUID pH solution 100% > 13.

CHARACTERISTICS

DESTAR LEGNO FLUID is a specific alkaline product for the crust removal formed during fermentation, aging and concentration process in wood casks.

APPLICATIONS

DESTAR LEGNO FLUID is a specific product studied for detergency and for tartrate removal of wine wood barrels for oenology. In other food industries the product is used for the washing of filling machines, wrapping machines and tanks particularly sensitive to the activity of causticity.

DIRECTIONS FOR USE

For wood barrels it's recommended a concentration between 1 - 10% at temperatures of 15-25°C according to the tartrate to be removed. Always follow with an accurate rinse with drinking-water until you reach a neutral pH. After rinsing proceed with a sanitization process with STERIL LEGNO. For other applications, concentrations vary from 0.5-2%, at temperatures from 20 to 70° C, with contact time ranging from 5 to 10 minutes depending on the type of dirt.

DE TAR LEGNO FLUID

TARTRATE-REMOVAL DETERGENT FOR WINE WOOD BARRELS

PACKAGING

21 kg drums.

STORAGE

Keep the product well sealed in the original packaging, protected from light.

HAZARD

Based on the current European regulations the product is classified: hazardous (see MSDS).
