

DETERGENTI

V LUBE F

LUBRICANT FOR CONVEYORS, SOAP-FREE,
NOT AFFECTED BY WATER HARDNESS

COMPOSITION

V LUBE F is a lubricant, detergent, not affected by water hardness.

CHARACTERISTICS

V LUBE F has many advantages in comparison to lubricants based on soap:

- Compatibility with aluminum, glass, steel, waterproof cartons, plastic and poly laminated materials;
- Reduced use concentration;
- Low quantity of foam;
- Sanitation activity.

APPLICATIONS

V LUBE F can be used in every field of food industry where in addition to the activity as lubricant, a sanitation activity on conveyors is required.

DIRECTIONS FOR USE

V LUBE F can be used both in the immersion systems and in the centralized distribution systems.

The use concentration 0,1 to 1%, changes according to what you need and to the kind of plant. Being incompatible with lubricants based on soap it's important to proceed with the cleansing of the conveyors before using V LUBE F. At the end, it's recommended a stability test of the solution.

Consult VASON technical team for assistance.

V LUBE F

LUBRICANT FOR CONVEYORS, SOAP-FREE,
NOT AFFECTED BY WATER HARDNESS

PACKAGING

25 kg and 200 kg drums.

STORAGE

Keep the product in its original package well closed, far from heating sources.

HAZARD

Based on the current European regulations the product is classified: hazardous (see MSDS).

CORROSIVE ACTION

V LUBE F is only partially corrosive towards carbon steel, zinc, copper and its alloys.
